# OUR PHYSIOTHERAPISTS SPECIALIZE IN

## **POST-SURGERY REHABILITATION**

Rehabilitation is medical assistance that can help you regain, maintain, or increase the abilities you need to function in daily life. These skills could be cognitive, mental, or physical (thinking and learning). You might have lost them as a result of an illness, an accident, or a side effect from the medication.

## **CHRONIC PAIN MANAGEMENT**

Chronic or persistent pain is pain that carries on for longer than 12 weeks despite medication or treatment. Most people get back to normal after pain following an injury or operation. But sometimes the pain carries on for longer or comes on without any history of an injury or operation.

## **SPORTS INJURIES**

Sports rehabilitation aims to improve your mobility and physical fitness, which occur in any activity. Fitness and back to sports for patients with ligament meniscal and other bone injuries.

With one of our highly qualified physiotherapists, we may schedule one-time visits as well as ongoing sessions at a time that works for you. Our physical therapists create individualized treatment plans to assist you in controlling your condition, achieving your objectives, and living pain-free.
