BENEFITS OF THIS SERVICE

Provides More Personalized Care

First off, having your doctor come to your home greatly enhances the patient experience and makes it much more customized to your needs. Home visits are also frequently handled much more calmly and precisely, with less hurry. This allows medical professionals a greater opportunity to speak with you, evaluate your symptoms, do a thorough examination, and determine a treatment plan if necessary.

Keeps Elderly Patients Out of Hospitals and Urgent Care

Doctors may offer excellent in-home medical care to their senior patients as well as those with chronic diseases and disabilities when they have a doctor on call. This is essential because it enables elderly individuals and those who are more vulnerable to receive prompt, effective care without having to travel to urgent care centers or hospitals.

Saves Patients Time and Money

House calls also help patients save time and money, which is a significant advantage. Patients avoid unnecessary costs and stress because they don't have to pay for transportation to the doctor's office, take time off work, or make childcare arrangements. Naturally, one of the elements of excellent care is lowering anxiety-related feelings related to money, work, or children.

Reduces Patient No-Shows

A patient missing their appointment is more than just a minor inconvenience from the perspective of the healthcare professional. It could result in a loss of time, money, and even more disruption for other patients. By paying for house calls, doctors can significantly lower patient no-show rates, which enhances the delivery of healthcare services as a whole.

Prevents Patients from Being Exposed to Germs

Since we all want and need to protect ourselves and our loved ones against the deadly coronavirus, it is now more crucial than ever to avoid being exposed to viruses. Medical home visits make it possible to do just that. Patients can avoid waiting in crowded waiting areas and perhaps being exposed to viruses and bacteria by having doctors visit them at home.

II. RPHC IV THERAPY PACKAGES

NAD+ ANTI-AGEING IV THERAPY

It's your time for ETERNAL YOUTH

NAD is one of your body's most important molecules and is present in every living cell.

In a living cell, NAD helps in cellular processes like oxidative phosphorylation and DNA repair. Also, NAD helps in ATP production and modulated gene expressions. Anti-Aging IV therapy boosts the antioxidant vitamin and mineral levels in your body much more effectively than oral supplements. Achieve a youthful appearance and improve overall wellness with our Anti-Aging IV Drip. This infusion contains a combination of NAD+ & MSM, Vitamin C, and B vitamins to promote cellular repair, detoxify the body, and boost collagen production for elastic skin. Additionally, B vitamins aid in repairing and reducing muscle pain caused by overuse or damage. Rejuvenate and revitalize your body with our Anti-Aging IV Drip.

MSM (METHYLSULFONYLMETHANE) is a chemical found in both plants and animals, including humans.

Possible extra benefits of MSM:

- Relief of constipation
- Lessening of scar tissue
- Softer skin
- Stronger thicker hair that grows faster and stops split ends
- Fingernails grow twice as fast and are less brittle
- More energy

IV DRIPS OFFERS:

3-4 Sessions of NAD + ANTI-AGEING DRIP

4-6 sessions of NAD + ANTI-AGEING DRIP

For optimal results, usually we require 4-6 sessions of IV drip treatments for maximum effectiveness. You may also take advantage of 3-4 session options. In addition, the quantity of IV drips you will receive will determine the best outcomes.

For the complimentary with our IV treatment, we are providing a free blood check-up.

This infusion contains a blend of:

- Ascorbic acid (Vit C)
- Thiamine HCl (Vit B1)
- Riboflavin (Vit B2)
- Dexpanthenol (Vit B5)
- Pyridoxine (Vit B6)

- Calcium L-5- methyltetrahydrofolate (Vit B9)
- Hydroxocobalamin (Vit B12)
- Biotin
- L-lysine
- Magnesium chloride
- MSM

EXPERTS IN IV INFUSION THERAPY

At our healthcare center, we specialize in IV Infusion Therapy and have over two decades of experience in this field. We work with leading compounding pharmacies to develop effective and unique treatments for our clients. Our IV infusions are freshly prepared on-site to ensure the highest-quality and safety for our patients. We offer over 16 premium IV infusions, which are compounded using the highest-quality ingredients and are designed to treat a wide range of concerns, including fatigue, stress, jet lag, low immunity/flu, dull hair and skin, pain, hangover, hormone imbalances, obesity, and diabetes.

IV THERAPY IS PROVEN TO BE EFFECTIVE

IV Therapy has been scientifically proven to be effective, thanks to its 100% absorption rate, fast and effective results, natural and safe ingredients. Unlike oral vitamin supplements, IV infusions are delivered directly into the bloodstream, ensuring a 100% absorption rate. Our Push IVs and Booster shots take just seconds to administer, while our signature drips take 45 minutes. Clients may feel the effects immediately after receiving the infusion. Our bespoke IVs contain vitamins, minerals, and active ingredients that are scientifically proven to address several health and wellness concerns, making it a safe and effective option for addressing specific health conditions.
